## Superep Catalog Views Customization

The different views of the Superep catalog on the iPad are now customizable. You can change the columns and headings that appear in the various views; select the properties you wish to appear in each view; customize the headings; and sort the column order.

## Matrix View Customization

While viewing matrix items in the catalog, sales reps now have detailed item information about style variants at their fingertips.

The matrix gridline view is now fully customizable. The column names and headings can be customized to include your item properties and information. Just select "Superep flat grid view" from the menu in the catalog customization and select the columns you wish to appear. You can then sort them and customize their headings.

## Cart Enhancements

You can now sort the list of items in the Cart as well as the Order PDF by any of the properties of the items.

## Order PDF enhancements

Add your sales rep's contact information to the Order PDF.
